

Information for the guardians about the School survey

Hello!

Now it's time for the School survey. The School survey is an online survey addressed to parents/guardians, students and educational staff. The questionnaire is available to be answered from 2023-01-23 to 2023-02-24.

All children and teenagers have the right to a good education in a safe environment. The Swedish school inspectorate is a governmental regulatory agency to check that all schools meet these requirements. The survey results provide an important basis for the school inspectorate supervision which aims to contribute to a better school with better results. Some of the results will also be compiled into statistics and sent over to the education department information service for parents and students.

You as guardians of children in pre-school, primary or special primary school have the opportunity to share your views about the school through the school survey. The school survey can be answered on the website and it takes about 10 minutes to answer. If you have several children at the school in question, you need to answer the survey for each and every child separately. The results will be presented in a compiled form and will not be disclosing any information that can damage any individual. The responses will not be processed by the school, but by the Swedish Schools Inspectorate.

The school survey will also be answered by the educational staff, pupils in primary school grades 5 and 8 and upper secondary grade 2. Students will answer the survey during school hours. If you have a child in grade 5 or 8 and do not want her/him to answer the questionnaire, you should notify the school.

To answer the questionnaire:
